

**Personal and family wealth continues to grow rapidly across the Middle East, Africa and South Asia (MEASA) region, driving record demand for wealth management services.**

Individuals and families require all types of wealth solutions. Interest is particularly strong in investment and portfolio management, estate and inheritance planning, Sharia-compliant wealth management, and real estate and financial advisory.

DIFC stands apart with its platform to serve these regional customers. The Centre combines a large ecosystem of specialist professional services providers, a location at the centre of the region's financial services industry, and a legal and regulatory environment designed to address the needs of individuals, families and institutions.

Wealth Management is one of four areas within the Wealth and Asset Management focus at DIFC. The other areas include Asset Management, Private Equity, and Fund Management.
